

# Parent Information

Mrs Hine Year 1 Spring Term 2010

Our topic this term will answer the question:

## What makes a home?

Dear parent,

In this topic we will be looking at houses and homes. In science we will be finding out about materials around the home. What are chairs made from? Why are windows transparent?

In geography we will be learning about maps and plans. Can you help your child find out and learn their address and post code? What did houses look like a long time ago. In history we'd love to have a look at any interesting household objects you have from long ago (not too precious please) P.E is on Tuesdays and Fridays this term which is dance and gymnastics. In computers we will be collecting, recording and interpreting information. Lots of work with graphs and charts!

### Numeracy

We will be exploring additions and subtractions and learning to find the difference between two numbers. Why don't you practise at home some of the number facts we already know. We know our doubles to  $10+10$ . We can count in steps of 2, 5 and 10. We know numbers that add up to 5. Can we turn them into subtractions... $3+2=5$   
 $5-2=3$

### Literacy

We will be doing lots of work with traditional tales and fairy tales so think about your favourites and share them in class. Please carry on the super effort to read at home every night and practise any new words and spellings.
