

Around The World In 84 Days

Dear Parent

In our topic, this Spring, Year 2 will be travelling the globe to learn all sorts of interesting facts and skills. We will be learning to read maps, atlases and information books and using websites to discover things about the continents in our world. We will be finding out about famous people and events, listening to world music, looking at artwork from across the world as well as creating our own masterpieces. We will need a vehicle to travel in so we will be designing and building those too.

Literacy

Your child will be learning to use information books with contents pages, indexes and glossaries. They will be reading poetry and traditional stories from around the world and using these as a basis to develop their writing with accurate punctuation, connectives and fantastic word choices.

Please keep supporting your child at home with their reading daily too, it really does help!

Numeracy

We will be continuing to secure recall of number facts, developing our knowledge of times tables, multiplication and division and solving real life problems. We will be building confidence with money, telling the time and learning how to measure length, mass and capacity too. Watch out for homework on all of these areas!
