

# Parent Information

Mr Shoobridge Year 6 Spring Term 2010

The question we will be asking in our topic is.....

## **Is there anybody out there?**

This topic will involve work about the Earth, the planets in our solar system, Astronauts and space flight and the possibility of other life forms.

It will involve a range of activities that will enable children to develop their research techniques, produce both fiction and non fiction writing and learn about the Science of Earth and space. They will be considering questions such as.....

- Are you brave enough to be an astronaut?
- Could we live in space?
- Does the Earth and other planets move?
- What is there out there in space?

We will also be covering a range of different genre in literacy for both reading and writing, and of course revising and practising all maths concepts leading up to SATs. In addition to this, the York Cares students will be delivering a programme of study on healthy eating.
